

**Specification:**

Heavy-duty hydraulic jacks of the ECO-Jack XR series do, compared with the ECO-Jack S-series, require an external 700 bar pump for operation. This facilitates and accelerates working in confined conditions and when using several jacks at the time. The compact design without a pump leads to a weight reduction of up to 30% and allows for easy handling for optimal use under extreme conditions. External pumps allow simultaneous operation on several ECO-Jack XR series machine jacks by one person. The ECO-Jack XR series has an integrated spring return system, which always returns the machine lifter automatically to the starting position.

**Technical data of hydraulic jacks:**

#	01 150 31 01	700 bar	400 ml	40 kg
HH	155 mm	15000 kg	12000 kg	
	3 x 97 mm	20 mm	External pump	
		L x B x H	245 x 331 x 316 mm	

**Please always observe the operating instructions, their safety instructions and local conditions!**

#	Part No.	Maximum operating pressure in bar	Oil quantity in the tank / cylinder in ml. Standard oil HLP 32 other oils on request	Weight kg	Dimensions in mm L x B x H
	Adjustment positions Distances in mm	Maximum stroke in mm	Maximum lifting load with the lifting head in kg	Maximum lifting load with lifting claw in kg	
	Insertion height in mm
