ROTO Load moving system, 360 ° rotatable, 3-/4- load points

HTS

Specification:

Heavy-duty load moving system for the professional indoor heavy load transport on clean, smooth and level floors. Designed as a rotating load moving system with anti slip rubber pads and high-quality HTS 3-component polyurethane wheels, which are abrasion-resistant, cut-resistant and non-marking and suitable for all smooth and level floors with slight unevenness. In combination with an S, DUO or other ROTO chassis with the same installation height it forms a secure overall system with 3 load points. (with secured load also with 4-point support if the operating instructions are observed).
